

MOULDING EQUIPMENT

DIEHL ESL-25 STRAIGHT LINE RIP SAW

A mid-size rip saw that cuts raw lumber into the most economically sized moulding blank for running straight moulding. This machine has five-foot glue line accuracy.

IIDA MILLENNIUM SERIES MC-251/6 MOULDER

A precision moulder that is designed to produce an excellent quality product both in job lots and high quantity production.

MIKRON M645 MULTI-MOULDER

A specialty moulder with an adjustable tilting head and floating table top. Creates circles, ellipses, stair parts, curved crowns, bar rails and straight mouldings up to 6" wide.

NIELSEN MODEL #45 PROFILE GRINDER

The heart of any moulding operation is the ability to cut and sharpen moulder knives. This machine allows us to make the highest quality knives to create custom moulding for our customers.
